

Week 4: Architecture and Design

- **Team report**

1. **Goals planned for this week:** **Copy section 3 of Team report from Week 3 here**
 1. *Decided on concrete features 7 days*
 2. *Decided on how it will be implemented in 7 days.*
 3. *Decide on usability 7 days*
 - a. *Come up with use cases 3 days*
 - b. *General risk 3 days*
2. **Team progress and issues:**
 1. *We figured out all the features we want what worked*
 2. *A majority of the team was sick and were unable to meet.*
 3. *We didn't communicate well and ended up missing a lot of what we wanted.*
3. **Goals planned for next week:** **(These are higher-level tasks for the team)**
 1. *Meet with team and start working on presentation*
 2. *Finalize design*
 3. *Start assigning implementation sections.*

- **Contributions of individual team members**

1. **Team Member 1 (Kyohei Yamaguchi):**

Team progress and issues:

1. *Revised and added new sections to living doc on git*
2. *This week not much progression due to the lack of communication*
3. *Making plan takes time*
4. *Could not decide the design and architecture of software*

Goals planned for next week: **(These are lower-level tasks for which this team member is accountable)**

1. *Decide design and architecture in 2 days.*
2. *Understand the basics of flask in 2 days.*

Team Member 2 (Brian McCarthy):

Team progress and issues:

1. *Reported to the rest of the group what we did in class*
2. *Could've communicated more*

3. *Being in class is very important*
4. *Worked on living document*

Goals planned for next week: (These are lower-level tasks for which this team member is accountable)

1. *Decided on what languages to use in 2 days.*
2. *Figure out how to host a web server in 4 days.*

Team Member 3: Sangwoo Park

Goals planned for this week:

1. **Brainstorm use cases**
2. **Working on the document**

Team progress and issues:

1. *Helped contribute to writing and organizing sections of the team living document.*
2. *This week did not go as well personally due to limited participation, which I regret and plan to improve moving forward*
3. *Learned more about how architectural decisions and documentation affect overall project direction*
4. *Had trouble staying fully engaged this week because of scheduling conflicts and team communication issues, and am still catching up on some design details*

Goals planned for next week: (These are lower-level tasks for which this team member is accountable)

1. *Review and help finalize architecture and design documentation*
2. *Assist with assigning implementation sections and preparing presentation material*

Team Member 4 Charley Lotspeich:

Goals planned for this week: Copy section 3 of Team Member 1 from Week 3 here

1. **Brainstorm Use case 3 days**
2. **Help finalize features 4 days**

Team progress and issues:

1. *Revised and added new sections to the living doc in git*
2. *Having each member come up with features that they wanted to go into detail explaining*

3. *Creating a detailed plan for what the project would include was a lot more time-consuming than expected.*
4. *where team member had trouble and where team member is stuck*

Goals planned for next week: (These are lower-level tasks for which this team member is accountable)

1. *Solidify coding language and guidelines that go along with it in 2 days.*
2. *Starting the implementation process in 2 days.*
